

New Product Release Announcement SumiMark IV 300 DPI Marking System

Dec. 01, 2011 — Sumitomo Electric Interconnect Products officially announces release of the **SumiMark IV 300 DPI Marking System**.

This latest version of the SumiMark Marking System combines the best features of previous models into one unit. Key features include:

- 300 DPI print head for superior print quality.
- Easier material loading design for changeouts in under 30 seconds.
- Print head pressure adjustment to obtain best print quality.
- USB and Ethernet interfaces for multiple communication options.
- Marker counting feature to keep track of number of markers printed.
- Pause feature allows you to stop printing during a job and resume later.
